

# Masterpiece™ Wind Load

## Perfect Combination of Looks and Strength

The flagship of the Raynor Traditions Series, Raynor Masterpiece steel garage doors feature 2" thick sections, a continuous thermal break between sections, and expanded polystyrene insulation bonded between two steel skins for an outstanding 10.25 R-value. Masterpiece features the EnduraCote™ hardware system. Masterpiece doors are available in post, u-bar and strut design.

### Insulation

Masterpiece 2" thick sections feature a core of polystyrene insulation pressure bonded between two high-strength, impact-resistant steel skins, resulting in an impressive R-Value of 10.25.

### EnduraCote™ Hardware System

The EnduraCote Hardware System comes with extended-life springs, powder coated track and hardware that provides a clean, finished look, and maximum protection against rust.

### Thermal Protection

A vinyl joint seal prevents airflow between sections, while a mechanically interlocked vinyl thermal break prevents heat loss and eliminates metal to metal contact between hot and cold surfaces, allowing the insulation to be fully effective.

### Raynor Secure

Masterpiece doors are available in a wide variety of pressure ratings to meet your local wind codes.

## Colors

### Standard

\*Features the Kynar® paint process, which provides extended UV protection against fading.

### Optional

Raynor's OptiFinish paint process allows your Masterpiece door to be customized with more than 1,800 Sherwin-Williams™ colors.

## AccuFinish®

AccuFinish is a uniquely engineered, wood-look laminate film available in Dark Walnut, Cherry and Cedar. Doors featuring AccuFinish provide the truest representation of wood available for steel garage doors.

## Decorative Hardware

The black matte powder coated straps and handles are designed to appear hand-forged, adding a historically-accurate dimensional quality to your door. Choose from handles and straps with Bean or Fleur-de-Lis designs.
